COURSEWORK

UNDERGRADUATE

Data Structures Algorithms

Design and Analysis of Algorithms

Object Oriented Programming

Operating System

Database Management System

Computer Networks

SKILLS

PROGRAMMING

Experienced:

• Java • Html • CSS • C • JS

• React.JS • node.js • Express.js

• MongoDB

Intermediate:

• Python • PHP • Shell Script

Familiar:

• Socket.io • MySQL

CAREER OBJECTIVE

- To obtain a challenging position as a software developer in organization where I can utilize my technical skills, creativity, and problem-solving abilities to contribute to the growth and success of the company, while continuously improving my knowledge and skills in the field of software development.

PROJECTS

AKHILAM INTERIOR | DS PROJECTS

- This project is a web-based application that is portfolio of dsprojects.
- In this project I used aos(animation on scroll library) for to deliver great user interface.I used php to accept Contact us form from user and I also made smart card of akhilam Interior and just one click you can download from website .
- I have created this project using core html,css,js
- Website link is : [www.akhilaminterio.com](#)

SAFEWAY | PROTECT YOUR JOURNEY

- This project is a web-based application built using .NET technology, specifically the ASP.NET framework
- This web app keeps you aware about all the accident going around you.
- App provides all the locations where recent accident happen. also it categorise the hi zone on the number of death . denoted as red zone , orange zone and green zone.
- It also provides nearby hospital and petrol pumps as well.

APPOINTMENT | BARBER APPOINTMENT

- The application allows users to create new accounts and securely authenticate using their email address and password. JWT tokens are used to manage user cookie and ensure secure access to the application's features.
- Barbers can create and manage their profiles, providing essential details They can also update their availability and prices as needed.
- Barbers can do CRUD operation.
- I have created this project using react.js , node.js , express.js , socket.io , CSS , jwt , MongoDB , nodemailer.

AUTHENTICATION | WITH GOOGLE , APPLE AND FACE ID

- An authentication app with Google ID, Apple ID, and Face ID is a secure and convenient way for users to log in to various online platforms and services.
- This authentication app, users can easily and securely authenticate their identity using their Google or Apple ID, or by using their face as a form of biometric authentication.
- The integration of Google and Apple IDs allows users to use the same login credentials across multiple apps and services, which can streamline the login process and improve the user experience.
